PREFACE

Welcome! This is an **Unofficial/Fan made** project about the magical girls RPG videogame franchise **Blue Reflection**.

This project contains the skins of each character seen on the games and the anime T.V. show, which can be used as custom skins for the player in Minecraft PC (Java & Bedrock) and Mobile (Pocket) editions (unfortunately, not supported in console versions).

Giving a short context, in the games (and anime) there are students and Reflectors, magical girls who fight with the power of feelings. Therefore, this pack contains mainly student and reflector skins, but also has many other outfits based on official DLCs and more.

In the next pages below of this user manual, there are mentioned the downloading methods of the pack, its content and structure with the latest release's features.

DISCLAIMER

The Blue Reflection brand belongs to Koei Tecmo Holdings Co., Ltd. and Gust Co. Ltd., so I don't own any rights about the Blue Reflection franchise, including all the tangible and intangible products and goods.

All another rights reserved by their respective owners.

For terms of use of this project, read the License file attached to the **Blue-Reflection-Minecraft-Skins-Pack** main folder. In summary, these are the project's license features (what you can do or not with).

DOWNLOADING PACK FOR PC

RELEASE METHOD

This is the easiest way to download the skins on your PC's disk. Recommended only if you want to download the pack once.

- ◆ **Step 1:** Go to the repository's main page by clicking on the following link:
<https://github.com/alvarvelazquezdeleonlavarrios/Blue-Reflection-Minecraft-Skins-Pack>
- ◆ **Step 2:** Look for the **Releases** section and click on it.

The screenshot shows the GitHub repository page for 'Blue-Reflection-Minecraft-Skins-Pack'. The repository is public and has 1 branch and 1 tag. The main content area displays a list of commits, while the right sidebar provides an 'About' summary and links to 'Readme', 'GPL-3.0 license', 'Activity', '0 stars', '1 watching', and '0 forks'. A red box highlights the 'Releases' section, which shows 1 tag and a 'Create a new release' button.

- ◆ **Step 3:** Look for a release of your preference, and click on its ZIP file to download it.

Blue-Reflection-Minecraft-Skins-Pack-[Ver. Beta]

Pre-release

Blue Reflection Minecraft Skins Pack [Ver. Beta] is here!

Hello there! I finally decided to upload all the skins in a single zip file for you to download. I would call this a 'zero' release of the pack (the first "official" version will be published in a future, with important changes and fixes in the textures).

I decided to upload this release as a **beta** because I wanted to save the first skins versions I've made since I started this project. So, if you're one of those people that followed my work from the BR Discord Server, you don't have to worry about if you liked my first "art style". You can download them in this release!

Features of this release:

- Blue Reflection: 15 folders (students, reflectors, DLC's outfits and more)
- Blue Reflection Ray: 8 folders (students, reflectors and more)
- Blue Reflection Tie: 15 folders (students, reflectors, DLC's outfits and more)
- Blue Reflection Sun: 2 folders (students and eroded characters)
- Uniforms (templates of every school uniform)
- Costumes (templates of special costumes used by the characters)
- Accessories (templates of some accessories mainly from reflector and eroded costumes)

▼ Assets 3

 Blue-Reflection-Minecraft-Skins-Pack-.Ver.Beta.zip	49.7 MB	35 minutes ago
 Source code (zip)		2 hours ago
 Source code (tar.gz)		2 hours ago

- ◆ **Step 4:** Unzip the ZIP file and move the folder to your favorite location. Enjoy!

COMMAND LINE METHOD

Important Note: this option requires you to have a GitHub account!

This way is more complex and intended for those users who have coding or know about the use of the Git Bash or a command line terminal. Recommended if you want to be one of the first users on testing the new features before they'll be launched in an official release.

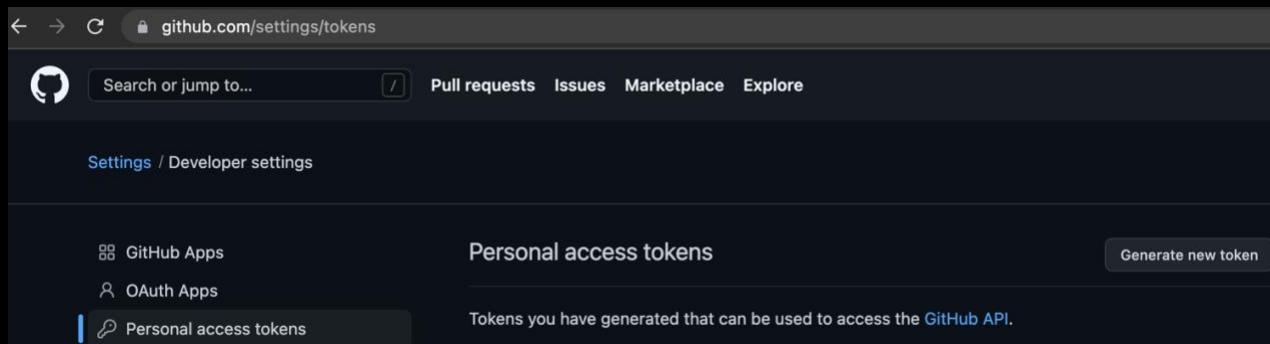

- ◆ **Step 1:** Install Git

First of all, you'll need to install Git on your computer. Here you can download [Git](#). Just follow the instructions according to your PC's Operative System.

- ◆ **Step 2:** Generate a personal access token

Due to changes in GitHub's security policies, you can no longer use your GitHub's account password as authentication when typing commands in the Git Bash or Terminal. So now you must generate a token for your GitHub account.

1. After installing Git on your PC, in your GitHub account you must generate a personal access token (PAT). For that, go to your **Setting --> Developer setting --> Personal access tokens** and click on the button **Generate new token**.

2. Give the token a descriptive name, set the expiration time and select the permissions you want (for this project, is enough with *repo* permissions). Click on the green button **Generate token**.
3. Copy the token generated to your clipboard or in an auxiliary plaintext file. **Caution: you must save temporarily that token, or you won't be able to see it again!**

For more information and references, read the GitHub documentation about [this topic](#).

- ◆ **Step 3:** Setting up your PC's keychain to GitHub

Note: you'll do this step only once if this is your PC's first time using Git.

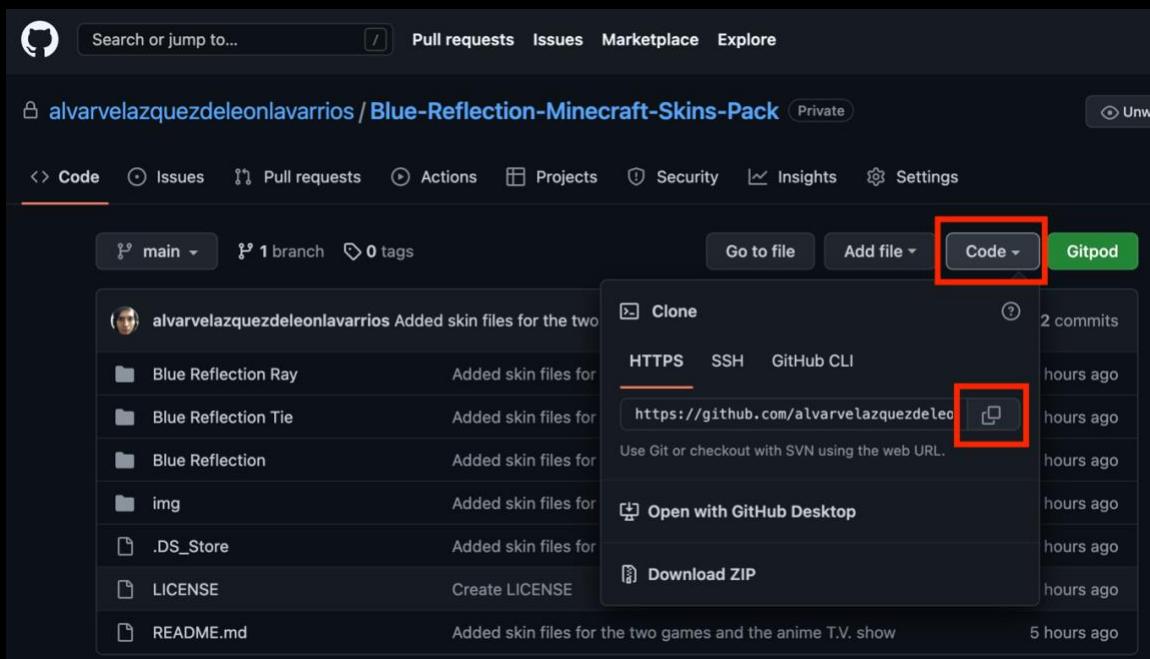

1. Open the Git Bash terminal (only Windows) or your CMD/Terminal application (Windows, MacOS and Linux).
2. Type in the command line `git config --global credential.helper manager` (Windows) or `git config --global credential.helper osxkeychain` (MacOS) to associate your PC's keychain to your GitHub account the next time you login via Git bash or Terminal. This is useful because you'll have to type your username and token only the first time you want to *clone*, *pull* or *push* a remote (web) repository.

For more information about linking your PC's keychain to GitHub, read these useful two pages:

- [Storing Git Credentials with Git Credential Helper](#)
- [How to use Mac KeyChain to store GitHub repos credentials?](#)

- ◆ **Step 4:** Cloning (downloading) the *Blue Reflection Minecraft Skins Pack* repository in your local disk

1. In the Git Bash, use the `cd` command to change your current directory (folder) to a specific directory on your PC (for example, `cd C:/users/YOUR_USER/Desktop`).
2. In the GitHub's repository [main page](#), click on the **Code** button. In the **HTTPS** tab, copy the URL to your clipboard.

3. In the Git Bash, type the command `git clone URL`, where `URL` is the link copied in the previous step. Press Enter.
4. If this is your PC's first time using Git, you'll have to enter the following information:

Username: your *GitHub username* (you can find it on your GitHub page's URL. For example: <https://github.com/alvarvelazquezdeleonlavarrios> --> `alvarvelazquezdeleonlavarrios`)

Password: your personal access token (generated and saved previously in your GitHub account)

5. After few seconds, you should see a new folder named ***Blue-Reflection-Minecraft-Skins-Pack*** in the directory you performed the `clone` command. This folder contains the skins (PNG files), another project files and the repository itself (.git hidden file). In addition, your username and password (token) are now stored inside your PC's keychain.
6. Finally, you can move the folder ***Blue-Reflection-Minecraft-Skins-Pack*** to your favorite location, but consider that your current path on the Git Bash doesn't exist anymore.

UPDATING PACK (COMMAND LINE ONLY)

If you want to receive the new features for your local repository, you must perform the following steps to update your local folder with the new changes from the remote repository:

- ◆ **Step 1:** Open the Git Bash application (or CMD/Terminal in Windows, MacOS or Linux).
- ◆ **Step 2:** Change the directory with the `cd` command to the *Blue-Reflection-Minecraft-Skins-Pack* folder path.
- ◆ **Step 3:** Type the command `git pull` to **update the skins pack**.
- ◆ **Step 4:** Finally, enjoy the new *non-official* features!

DOWNLOADING PACK FOR MOBILE DEVICES

Unfortunately, there is no a direct and safety way to download the entire pack to your mobile device (iOS or Android). Currently, there are two simple but inefficient methods for downloading the skins on a mobile phone or tablet:

- ◆ **Method 1:** Enter the repository's webpage via your mobile's web browser, and downloading each PNG file separately saving them in your photos application.
- ◆ **Method 2:** Having a PC, transfer the PNG skins images to your phone or tablet via USB (or AirDrop if you have Apple devices).

APPLYING SKINS TO YOUR MINECRAFT'S CHARACTER

PC VERSIONS (JAVA AND BEDROCK EDITIONS)

- ◆ **For Java Edition:**

1. Open the Minecraft Launcher
2. Select the Java Edition from the left window.
3. Select the **Skins tab**.
4. Click on **Add New Custom Skin**.
5. Upload a custom skin from the *Blue-Reflection-Minecraft-Skins-Pack* folder, and then make sure that it appears as expected on the character model, checking the body type (classic or slim) of your character.
6. Save the changes.

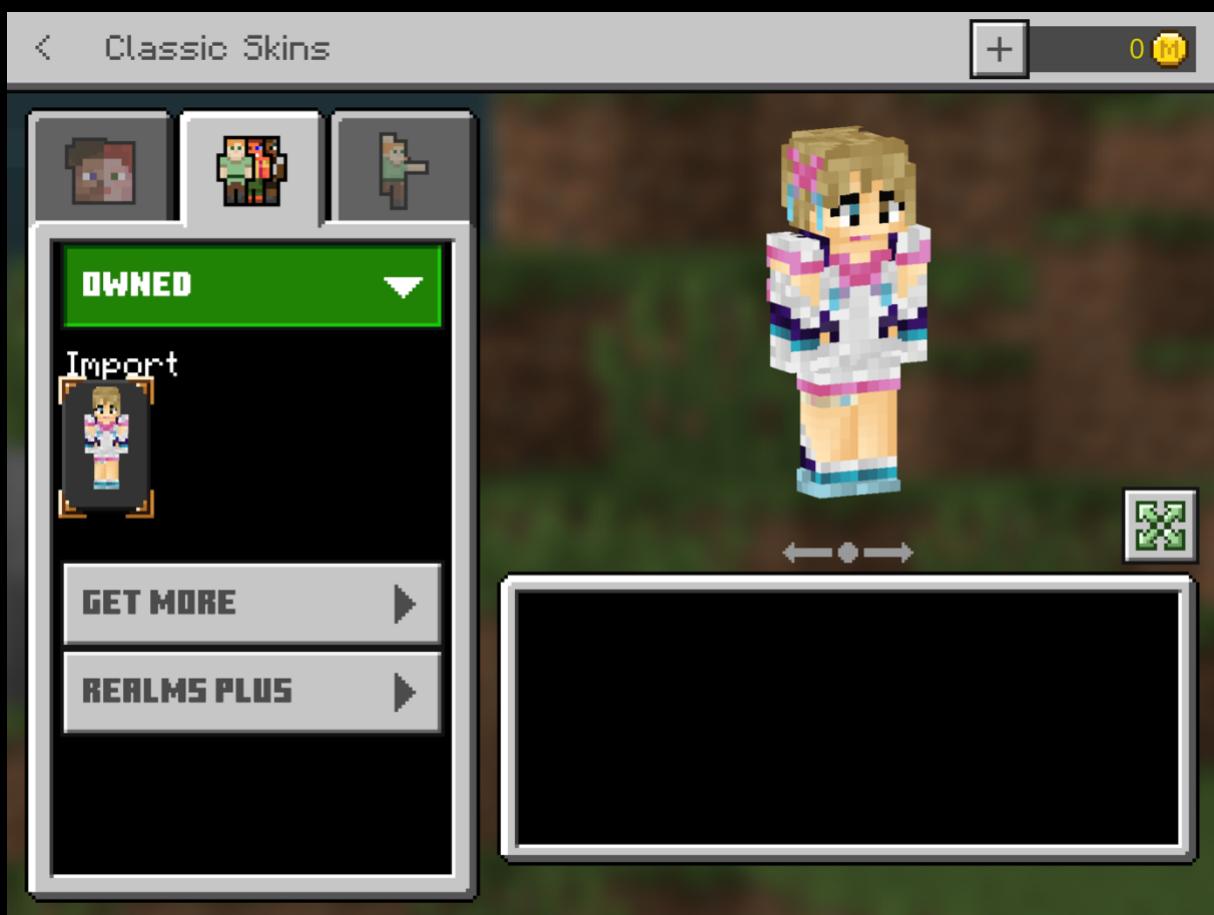

◆ For **Bedrock Edition**:

1. Open the Minecraft Launcher.
2. Select the Bedrock Edition from the left window.
3. Click on **Play**.
4. Inside the game, select **Dressing Room** under your current character.
5. Select the menu button at the top-left of the screen for more options, and then select **Classic Skins**.
6. Select the blank skin model under **Owned Skins**, and then select **Choose New Skin**.
7. Upload a custom skin from the *Blue-Reflection-Minecraft-Skins-Pack* folder, and then make sure that it appears as expected on the character model, checking the body type (classic or slim) of your character.

MOBILE VERSIONS (POCKET EDITION)

The process for Mobile devices is the same as for PC's Bedrock Edition, but skipping the Minecraft Launcher step and making sure the skin files must be allocated in the **photos application** of your mobile phone or tablet.

SKINS PACK CONTENT AND STRUCTURE

In summary, the pack's structure and its content is organized in the following folders:

- ◆ Blue Reflection
- ◆ Blue Reflection Ray
- ◆ Blue Reflection Tie
- ◆ Blue Reflection Sun
- ◆ Uniforms
- ◆ Costumes
- ◆ Accessories

Each one has custom skins for students, *reflectors* and other outfits in their **classic (4px)** and **slim (3px)** **body** type respectively, so you don't need to edit the images if you want to change the body type. All the textures are in PNG format.

BLUE REFLECTION

Contains the skins of the characters from the first game of the franchise released in 2017: *Blue Reflection*, also known as *Blue Reflection: Sword of the Girl who Dances in Illusions*.

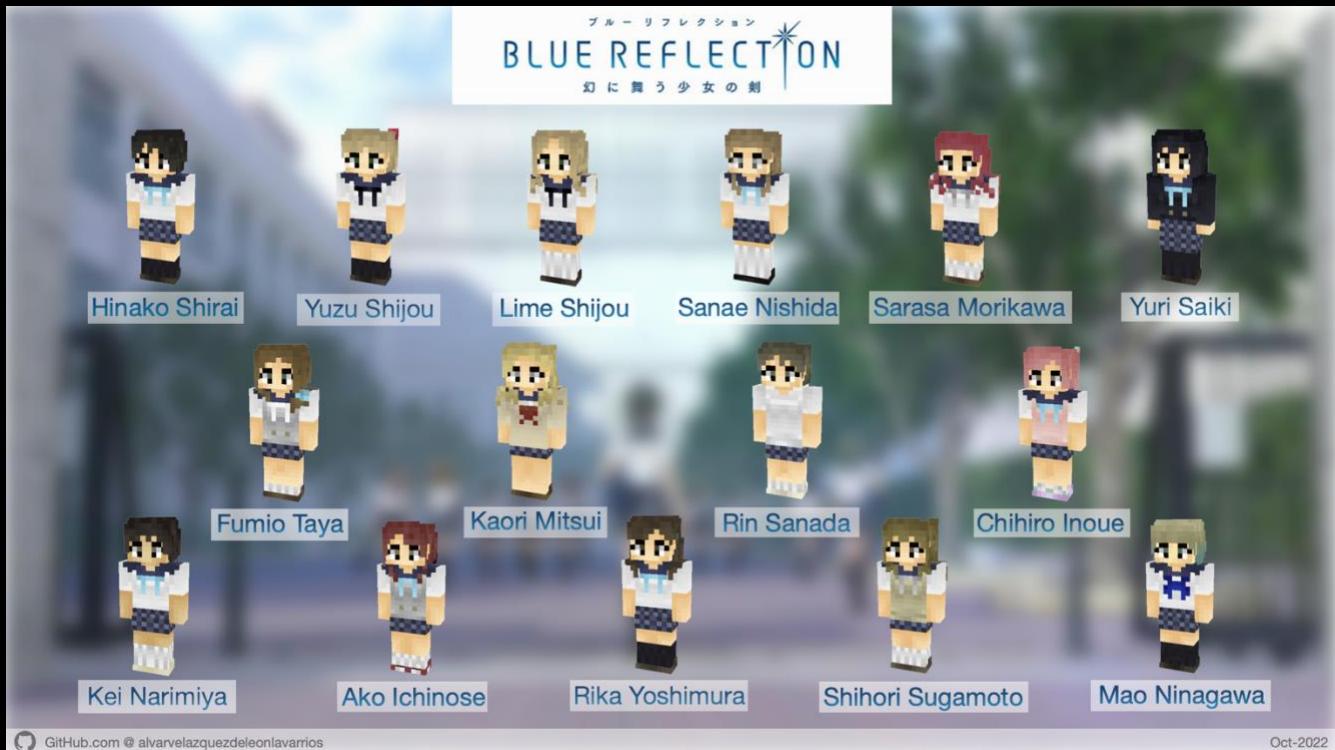

Content

- ◆ Students Skins
- ◆ Reflector Skins
- ◆ School Swimsuit
